

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
AMERICAN NATURALIST,
AN ILLUSTRATED MAGAZINE
OF
NATURAL HISTORY.

EDITED BY
A. S. PACKARD, JR., AND EDWARD D. COPE.

ASSOCIATE EDITORS:
W. N. LOCKINGTON, DEP. OF GEOGRAPHY AND TRAVELS.
PROF. H. CARVILL LEWIS, DEPARTMENT OF MINERALOGY.
PROF. C. E. BESSEY, DEPARTMENT OF BOTANY.
PROF. C. V. RILEY, DEPARTMENT OF ENTOMOLOGY.
PROF. O. T. MASON, DEPARTMENT OF ANTHROPOLOGY.
PROF. HENRY SEWALL, DEPARTMENT OF PHYSIOLOGY.
DR. C. O. WHITMAN, DEPARTMENT OF MICROSCOPY.

VOLUME XVII.

PART FIRST.

PHILADELPHIA :
PRESS OF McCALLA & STAVELY,
Nos. 237 AND 239 DOCK STREET.
1883.

Copyrighted 1883,
BY McCALLA & STAVELY,
For the Proprietors.

CONTENTS.

The History of Anthracite Coal in Nature and Art. [Illustrated.]	<i>James S. Lippincott</i>	1
The Development of the Male Prothallium of the Field Horsetail. [Illustrated.]	<i>Douglass H. Campbell</i>	10
On the Geological Effects of a Varying Rotation of the Earth.	<i>J. E. Todd</i>	15
On the Bite of the North American Coral Snakes (genus <i>Elaps</i>).	<i>Frederick W. True</i>	26
Achenial Hairs and Fibers of <i>Compositæ</i> [Illustrated.]	<i>G. Macloskie</i>	31
Instinct and Memory exhibited by the Flying Squirrel in Confinement, with a thought on the Origin of Wings in Bats	<i>F. G. King</i>	36
The Extinct Rodentia of North America. [Illustrated.]	<i>E. D. Cope</i>	43, 165, 270
The Kindred of Man	<i>Arthur Erwin Brown</i>	119
Indian Stone Graves	<i>Charles Rau</i>	130
Organic Physics. [Continued from p. 563, Vol. xvi].	<i>Charles Morris</i>	135, 259
The Mining Regions of Southern New Mexico. [Illustrated.]	<i>F. M. Endlich</i>	149
Recent Discoveries of Fossil Fishes in the Devonian Rocks of Canada	<i>J. F. Whiteaves</i>	158
On the Extinct Dogs of North America. [Illustrated.]	<i>E. D. Cope</i>	235
"The Plains" of Michigan	<i>V. M. Spalding</i>	249
Indian Music. [Illustrated.]	<i>Edwin A. Barber</i>	267
On the Occurrence of Fossiliferous Strata in the Lower Ponent (Catskill) Group of Middle Pennsylvania	<i>E. W. Clappole</i>	274
Pitcher Plants	<i>Joseph F. James</i>	283
The Naturalist Brazilian Expedition. (Paper I.—From Rio de Janeiro to Porto Alegre.)	<i>Herbert H. Smith</i>	351, 467
Unnatural Attachments among Animals	<i>John Dean Caton</i>	359
Butterfly Hunting in the Desert	<i>W. G. Wright</i>	363
Heterogenetic Development in <i>Diaptomus</i> . [Illustrated.]	<i>C. L. Herrick</i>	381, 499
A Study of the Immature Plumage of the North American Shrikes, to show their Descent from a Common Progenitor	<i>Thomas H. Streets</i>	389
Wampum and its History	<i>Ernest Ingersoll</i>	467
The Polar Organization of Animals	<i>Charles Morris</i>	486
Note on the Classification of Moths	<i>A. R. Grote</i>	496
Remarks on the Morphology of Arteries, especially those of the Limbs. [Illustrated.]	<i>Frank Baker</i>	505
The Hairy Woodpecker	<i>A. G. Van Aken</i>	511
Pearls and Pearl Fisheries. Part I.	<i>W. H. Dall</i>	579
Aboriginal Quarries—Soapstone Bowls and the Tools used in their Manufacture	<i>J. D. McGuire</i>	587
Annelid Messmates with a Coral	<i>J. Waller Fewkes</i>	595
Progress of Invertebrate Palæontology in the United States for the year 1882	<i>Charles A. White</i>	598
Note on the genus <i>Campeloma</i> of Rafinesque	<i>R. Ellsworth Call</i>	603
Mosses. [Illustrated.]	<i>W. W. Bailey</i>	608
Emotional Expression	<i>A. T. Bruce</i>	613
The Developmental Significance of Human Physiognomy. [Illustrated.]	<i>E. D. Cope</i>	618

EDITORS' TABLE.

The American Naturalist, 58; Nature in the Field, 58; The National Academy of Sciences, 59; Dates of issue of the Naturalist for 1882, 60; Spencer and Darwin, 174; The Bestiarians, 175; Home Credit, 176; Credit and Appropriation, 293; The Origin of the Fittest, 294; Time in Biological work, 295; Phylogenetic Diagrams, 391; Scientific Publications of the United States Government, 515; Bismarck as a Bestiarian, 516; The National Academy's meeting, 627.

RECENT LITERATURE.

A new edition of Sachs' Botany, 60; Disposition of the cervical Vertebrae in Chelonians, 61; Allen's Human Anatomy, 63; Thomas's Report on the Noxious and Beneficial Insects of Illinois, 64; The Geology of Philadelphia county, etc., 65; Jackson's Vegetable Technology, 67; Recent Books and Pamphlets, 67; Geikie's Text-book of Geology, 176; Ingersoll's Knocking round the Rockies [Illustrated], 178; Flower's Fashion in Deformity, 180; Catalogue of the Batrachia Salientia of the British Museum, second edition, 181; Matériaux pour l'Histoire Primitive et Naturelle de l'Homme, 181; Kingsley's Naturalist's Assistant, 182; Bicknell's Summer Birds of the Catskill, 183; Filhol's Notes on some Fossil Mammals, 183; Nicholson's Synopsis of the Classification of the Animal Kingdom, 184; Recent Books and Pamphlets, 184; Indiana Geology and Natural History, 296; Smith's Deep-sea Crustacea of the East Coast of the United States, 296; Whitman on the Dicyemids, 296; Verrill's Catalogue of New England Marine Mollusks, 297; Barrande's Silurian Acephalous Mollusks, 297; Bulletin of the American Museum of Natural History, 297; Emerton's New England Spiders, 298; Lacaze-Duthiers' History of *Laura gerardiae*, 288; The Mongoose in the West Indies, 299; Wilson's Wild Animals and Birds, 300; Recent Books and Pamphlets, 300; Seeley's History of the Skull, 392; Graff's Monograph of the Turbellarians, 393; The Zoological Record for 1881, 394; The German Zoological Yearly Record, 394; Revised edition of LeConte's Geology, 395; Zittel's Hand-book of Palæontology, 396; Davis' Glacial Erosion, 396; Lyman's Ophiuroidea of the Challenger expedition, 397; Miller's American Palæozoic Fossils, 397; Remarks on the Systematic Arrangement of the American Turridæ, 398; The United States Agricultural Report for 1881 and 1882 [Illustrated], 399; Recent Books and Pamphlets, 401; Lieut. Symonds' Report on the Upper Columbia river, 517; Penhallow's Vegetable Histology, 519; Luys' The Brain and its Functions, 519; Journal of the Postal Microscopical Society, 520; Cross on Andesite from Colorado, 520; Year Book of the German Malacological Society, 521; Proceedings of the Mineralogical and Geological Section of the Academy of Natural Sciences 1880-1881, No. 2, 523; Recent Books and Pamphlets, 526; Norwegian North Atlantic Expedition, 1876-8, 628; Godman and Salvin's Biology of Central America, 629; Recent Works on the Mouth-parts of Flies, 631; Martin and Moale's How to Dissect a Bird, 633; Mayer's Monograph of the Caprellidæ, 633; The Geological Record for 1878, 634; Geological Survey of Ohio, 634; King's Economic Relations of Wisconsin Birds, 636; The Zoological Record for 1881, 637; Recent Books and Pamphlets, 639.

GENERAL NOTES.

Geography and Travels.—Circumpolar Stations, 185; Danish Arctic Expedition, 186; Arctic Items, 176; Scientific Results of the Jeannette Expedition, 187; Geographical Notes, 188; Africa, 301; Asia, 302; Geographical Notes, 304; Africa, 402; The Oasis of Ouargla, 403; Geographical Notes, 404; Arctic Items, 527; Cape Horn Expedition, 528; Asia, 528; Capello and Ivens' Travels in Central and West Africa, 530; Asia, 641; Africa, 642; Geographical Notes, 644.

Geology and Palæontology.—On Uintatherium and Bathmodon, 68; The Nevada Biped Tracks [Illustrated], 68; The Geology of Chester county, Penna., 72; Kowalevsky on Elasmotherium, 72; Two new Genera of Pythonomorpha, 72; Scudder on Triassic Insects, 73; Some Tertiary Neuroptera of Florissant, Colorado, 73; Geological Notes, 73; The Sediments of the Gulf Stream Slope, 189; Filhol's Fossil Mammals of Ronzon, 190; New Mammalia from the Puerco Eocene, 191; Structure of Glaciers, 191; Geological News, 192; Physical and Geological Character of the Sea-bottom under the Gulf Stream, 305; The Tertiary Deposits of the Atlantic Slope, 308; A new fossil Sirenian, 309; The Geological Structure of South America, 309; Geological News, 310; Intermittent Wells in Nebraska, 404; Lydekker on Indian Mammalia, 405; The Ancestor of Coryphodon, 406; Note on the trituberculate type of superior molar and the origin of the quadrituberculate, 407; Geological Relations of Campbell island, 408; The Princeton Scientific Expedition of 1882, 408; Geological News, 408; New Orders of Crinoidea, 530; The Geology of Southern Africa, 531; Remarkable Land-Slips, 532; Intermittent Wells in Nebraska, 533; The genus *Phenacodus* [Illustrated], 535; Geological Notes, 535; The Decay of Rocks Geologically Considered, 645; Geology of the Chester valley of Pennsylvania [Illustrated], 646; Annual Report of the State Geologist of New Jersey for 1882, 648; The Tides on the Bay of Fundy, 649; A New Iguanodon, 650; Geological News, 650.

Mineralogy.—The Mechanical Separation of Minerals, 74; Axinite from Bethlehem, 75; Samarskite from Canada, 76; The Cryolite group of Minerals, 76; Heating Apparatus for the Microscope, 76; Mineralogical Notes, 76; Analyses of some Virginia minerals, 312; Analyses of some North Carolina minerals, 313; A new variety of Bournonite, 314; Native Gold alloys, 314;

Some Greenland minerals, 314; Tin in Alabama, 315; Telluriferous Copper, 315; The Nomenclature of Meteorites, 537; Gelatinous Silica, 538; Zeolites from Fritz island, 538; Native Lead from Idaho, 528; Topaz from Maine, 539; Turquoise from Arizona, 559; Molybdenite in Hong Kong, 539; Water in Chalcedony, 539; Some enclosures in Muscovite, 539; Dopplerite, 540; "Mother of Petre," 540; New Minerals, 651; Recent Lithological Work, 652; Charcoal as a Precipitant for Gold, 652; Crystallized Serpentine from Delaware, 653; The Fluorine Minerals, 653; A Norwegian Dust Shower, 654; Microlite from Elba, 654; Amelia County, Va., minerals, 654; The Wm. S. Vaux Collection, 654.

Botany.—The Interpretation of Schweinitzian and other early descriptions, 77; Watson's "Contributions to American Botany, X," 78; Botany in Minneapolis, 79; Sylloge Fun-
gorum omnium hucusque cognitorum, 79; Dr. Gray's Revision of the species of *Echinosperrum*, 80; New species of North American Fungi, 192, 316; New species of *Micrococcus* (Bacteria); 319; The movements of roots of Indian Corn in Germination, 412; A singular habit of *Psoralea argophylla*, 414; Whence came the Wild Potatoes of Arizona, 415; The number of species of North American flowering plants, 416; Note on the vitality of *Senecio scandens*, 416; Botanical Notes, 416; Dispersion of Seed by *Wistaria* [Illustrated], 541; Addendum to Article on the Compass Plant, 542; An Apical Cell in Gymnosperms, 542; Transition between Forms of Schizomycetes, 543; A Government Duty, 543; Botanical Notes, 544; New Western Grasses, 655; Memorandum as to the Compass Plant, 656; Classification of the Uredines, 656; A Note on *Tradescantia virginica*, 658; Influence of Moonlight upon Plants, 658; Remarkable fall of Pine Pollen, 658; Similarity of Plant and Animal Cells, 659; Botanical Notes, 659.

Entomology.—New lists of North American Lepidoptera, 80; The "Cluster Fly," 82; Naphthaline Cones, 83; Alternation of Crops versus the Wheat-stalk Isosoma, 84; Ravages of a rare Scolytid beetle in the sugar maples of Northeastern New York [Illustrated], 84; Mistaken Instinct in a Butterfly, 196; Observations on the fertilization of Yucca and on structural and anatomical peculiarities in Pronuba and Prodoxus, 197; Natural Sugaring, 197; *Epilachna corrupta* as an injurious Insect, 198; Spread of the Twelve-punctured Asparagus beetle, 199; *Trogoderma tarsale* as a Museum pest, 199; Phylloxera in California, 199; Hearing in Insects, 200; Instinct of the Seventeen-year Cicada (*Cicada septendecim*), 320; Food-habits of *Megilla maculata*, 322; Clothes Moths observed in the United States, 323; Lepidopterous larvæ and yellow flowers, 323; Note on *Mutilla (accidentalis L.)*, 323; The food relations of the Carabidæ and Coccinellidæ, 417; Relations of the Carabidæ and Coccinellidæ to Birds, 419; Phylloxera Laws, 419; Fostering the study of Economic Entomology, 420; Viviparity in a Moth, 420; Damage to Silver Plate by Insects, 420; The Hibernation of *Aletia xyliana* Say, in the United States, a settled fact, 420; Possible Food-plants of the Cotton-worm, 421; *Agrotis messoria* Harr. vs. *Agrotis scandens* Riley [Illustrated], 422; An internal Mite in Fowls, 422; Prevalence of the Screw-worm in Central America, 423; Dried Leaves as food for Lepidopterous Larvæ, 423; Lepidopterological Notes, 424; Obituary, 424; Railroad Cars as a means of disseminating Moths, 545; Insects as Food for Man, 546; Number of Molts and length of Larval Life as influenced by Food, 547; Ovipositing of *Diplax rubicundula*, 548; A small *Belostoma* captures a Fish, 548; Mosquitos vs. Malaria, 549; Entomological Notes, 549; The new Classification of the Coleoptera of North America, 660; A pretty and unique gall-making Tortricid [Illustrated], 661; Simulium feeding on other Insects, 661; Longevity in a Beetle, 662; Synopsis of the N. A. Heliethinæ, 662; *Stylopidised Andrenæ*, 663; Death of Professor Zeller, 663; Fig Caprificators, 663; Protection of Insect Collections, 663; The Chigoe in Africa, 664; Cocoon of *Telea polyphemus*, 664; The sucking organs of Bees, Bugs and Flies, 664; The "Pine Moth of Nantucket," 665; Entomological Notes, 666.

Zoology.—On the green color of the Oyster, 86; New and rare Fishes in the Mediterranean, 88; A cave-inhabiting Flat-worm, 89; Metamorphosis of *Penæus*, 90; The growth of the Molluscan shell, 90; The freshly-hatched young of the Horse-shoe crab, 91; *Scolopendrella* in Illinois, 91; Notes on Fishes, 91; The work of the "Travailleur," 92; Zoological Notes, 94; Propagation of Sponge by cuttings, 200; The circumpolar distribution of certain fresh-water Mussels, and the identity of certain species, 203; On the eastern range of *Unio pressus* (Lea), 204; *Bythinia tentaculata* (Linn.), 205; New localities for *Limax maximus* (Linn.), 205; A blind Copepod of the family Harpacticidæ, 206; The sucker on the fin of the Heteropods is not a sexual characteristic, 206; On the origin of the species of Ocyпода, or sand crabs, from the Bonin islands [Illustrated], 207; Heterogenesis in the Copepod Crustacea, 208; The Segmentation of the Vertebrate Head, 211; Anomaly in the flexor longus of the foot, 212; Rotifers without rotary organs, 212; The Vertebrates of the Adirondack region, 213; A curious Nudibranch Mollusk, 214; Zoological Notes, 215; Transactions of the Linnæan Society of New York, 324; Remarks on the Distribution of *Margaritana margaritifera* (Linn.),

324; The Systematic position of the Archipolypoda, a group of fossil Myriopods [Illustrated], 326; The Vogmar or Vaagmær (*Trachypterus arcticus*) and the king of the Herrings (*Gymnetrus banksii*), 330; Notes on Floridian and Texan Fishes, 331; Shufeldt's Contributions to the Anatomy of Birds, 331; A white Raven, 332; The Anatomy of the Chiroptera, 332; Zoological Notes, 333; The most remarkable Molluscan forms taken off the southern coast of New England in 1882, 425; Migration of Animals through the Suez canal, 425; Manual of the Sponges, 426; The Affinities of *Tetraplatia volitans*, 326; Occurrence of *Alaurina* in New England Waters, 426; *Limax maximus* in Central Massachusetts, 427; Tullberg on the structure of the Shell of Crustacea and Mollusks, 427; Wright's American Parasitic Copepoda, 427; Supposed Origin of the species of *Ocyropa* from the Bonin islands, 427; Chelydra vs. *Unio*, 428; A new species of *Polydesmus* with Eyes [Illustrated], 428; The Primordial Condition of Vertebrates as seen in the Skeleton of the Hag fish and the Lamprey, 429; The Electrical Organs and Distribution of the *Torpedinidæ*, 431; Importations of Indian Pheasants, 431; A many-named Bird, 431; The Biscayan Whale, 432; The Reproduction of the Hydrozoa, 432; Distribution of *Unio pressus* Lea, 433; The American Horse, 434; Zoological Notes, 435; Sudden Destruction of Marine Animals, 550; Desiccation of Rotifers, 551; The cause of "Rot" in Sheep, 551; Chromatophores in Crustaceans, 553; The Metamorphosis of *Peneus*, 554; Discovery of *Euryptaurus* in Europe, 555; Repugnatorial Pores in the *Lysiopetalidæ*, 555; Poison-apparatus of Scorpions, 555; The Habits of the Snake bird, 556; Zoological Notes, 557; The Embryonic Tentacular Knobs of certain Physophores, 667; Note on *Alaurina prolifera* Busch, 668; Enormous Spider's Web, 669; The Structure and Formation of the Covering of the Decapoda, 669; Hinckley on the Mouth Structure of Tadpoles, 670; Hybridization of Brook Trout and Grayling, 671; Effect of Birds on Insect Life, 671; The Hairy Woodpecker, a correction, 673; Zoological Notes, 673.

Physiology.—Beneke on Cholesterin, 98; A Correction, 98; Sense of Color in Cephalopoda, 99; Physiological News, 99; The recent accessions to our knowledge of the Physiology of the Heart, 215; The Poison of the Scorpion, 219; Electric Organs of *Gymnotus*, 219; Sense of Smell in *Actinidæ*, 219; Saline Elements in the Blood of marine Crustacea, 219; The Sixth Sense, 336; Atlas of Embryology, 336; A Myriopod which produces Prussic Acid, 337; The Tracheæ and the Source of Light in Fire-flies, 337; The Electromotive Properties of the leaf of *Dionæa*, 440; The Influences which determine Sex in the Embryo, 441; The production of Disease by Bacterial Organisms, 442; The Origin and Destiny of Fat Cells, 444; Recent Embryological papers on Vertebrates, 444; Embryology of the Silk-worm, 444; Development of *Bithynia*, a freshwater Pulmonate, 444; Early Development of the Salpæ, 445; Physiological Automaticity, 560; The Production of the Second Heart Sound, 560; A simple Method of demonstrating the Alkaline Reaction of the Blood, 561; Influence of Light upon Bacteria, 561; The Diastatic Action of Saliva, 562; Varying the Thermal Background of Reflex Perception, 562; Action of Digitaline on the Circulatory Organs, 563; Perception of Light and Color by the lowest Plants and Animals, 563; A Text-book of Physiology, 677; Comparisons of Strength between large and small Animals, 677; The direct influence of gradual variations of temperature upon the rate of beat of the Dog's Heart, 680; Skin vision, 680; Phosphorescence and Respiration in Annelid Worms, 681.

Psychology.—Teaching Brutes the use of Letters, 100; The Habits of a caged Robin, 102; The Nesting of the black and white Creeper, 103; A bewildered Snow-bird, 105; A Toad's Cunning, 105; Anecdote about Cats, 220; The modified Instincts of a blind Cat, 220; Additional remarks relative to teaching Brutes the use of Letters, 212; Dreams, 338; Fritz Muller on the Inheritance of Traditions among social Insects, 340; Animal Doctors, 445; Suicide of Scorpions, 446; Exhibition of Reasoning Power in the Polar Bear, 448; The Senses of Bees 448; The Frontiers of Insanity, 449; Romanes' Animal Intelligence, 564; Intelligence in Protozoa, 567; Maternal Anxiety in a horned Toad, 682; *Bufo americanus* at Play, 683; Intelligence in the Elephant, 684; A Story of a Dog, 684; The Mocking Bird, 685; Masking of Crabs, 686.

Anthropology.—Discovery of Mound Relics at Devil river, Lake Huron, 106; Stone Image from Miami county, Ohio, 107; Cup-shaped Stones in Pennsylvania, 107; Phonetics of the Kayowe language, 107; Anthropology in Europe, 108; Ethnology of the Vega, 223; The Manuscript Troano, 225; Archæological Lectures, 226; Music of North American Indians, 226; Languages of Africa, 341; The Antiquity of Man, 343; Bibliotheca Americana, 345; Researches of Miklukho-Maclay, 449; Revue d'Ethnographie, 450; Legends of the Iroquois, 451; American Copper Artefacts, 452; Babylonian Talismans, 452; White Indians in South America, 453; Cannibalism in New England, 453; The Brookville Society of Natural History, 453;

Mexican Archæology, 453; Anthropology in France, 453; Report of the Peabody Museum, 454; The American Antiquarian, 454; Popular Ethnology, 454; Dawkins on the Antiquity of Man, 455; The Carson Footprints, 567; Corea: The Hermit Nation, 568; Contributions to North American Ethnology, 569; A new African Speech, 569; The Peabody Academy of Science, 570; Archæology of Illinois, 570; The Wyoming Historical and Geological Society, 570; The Indian Office Report, 570; Progress of Anthropology in Germany in 1881-1882, 571; A new Anthropological Journal, 571; American Hero Myths, 687; Anthropometry, 688; Dialects of Bolivian Indians, 689; Race Color and Natural Selection, 691.

Microscopy.—Orientation in Microtomic Sections, 109; The Reconstruction of Objects from Sections, 110; Method of Reconstruction, 111; The Diffusion of Bacteria, 112; Proceedings of the American Society of Microscopists, 113; Destruction of Microscopical Organisms in Potable Water, 114; Drawing Apparatus of Professor His, 227; The Microbe of "Red Evil" a Pig Disease, 229; The use of Chloroform preparatory to imbedding in Paraffine, 345; Dr. Schulgin's Mixture for Imbedding, 346; Eau de Javelle as an agent for removing the soft parts from Microscopical Preparations, 346; Preparation of marine Algæ, 456; A new Method of Preserving and Staining Protozoa, 457; Method of putting Pelagic Animals to Sleep in order to obtain their Photographs, 572; Hertwig's Method of Preparing and Cutting Amphibian Eggs, 572.

SCIENTIFIC NEWS, 114, 229, 346, 458, 575, 692.

PROCEEDINGS OF SCIENTIFIC SOCIETIES, 116, 232, 350, 462, 577 695. Next volume we will have the societies mentioned and the page of each reference given.
